New York, NY | +1-732-783-8669 | rishiksarkar02@gmail.com | github.com/RishikSarkar | rishiksarkar.com

EDUCATION

Cornell University

Master of Engineering in Computer Science

Aug 2024 – May 2025

GPA: 3.9/4.0

Rutgers University-New Brunswick

Bachelor of Science in Computer Science (Honors), Cognitive Science

Sep 2020 – May 2024

GPA: 3.9/4.0

EXPERIENCE

Software Engineer

Instalily AI (Google Startup Accelerator)

Mar '25 – Present

New York, NY

- Built an agent for United Rentals using **RAG**, semantic search, **Azure AI Search**, **MCP**, and a custom LangChain-like framework integrated with UR APIs.
- Optimized embedding generation and vector database queries, boosting retrieval speed by over 40%.
- Refined the frontend chat agent and added **PostgreSQL** logging and metrics for monitoring and optimization.

Software Engineer (Contract)

AllAboutID (Startup)

Oct '24 – Nov '24

New York, NY

- Built a streamlined asset-management system using **MongoDB Atlas** with data-at-rest encryption, **JWT** authentication, and **RBAC**, plus dynamic **SVG** handling.
- Developed a responsive frontend with **Next.js** and **Tailwind CSS**, enforcing **HTTPS**, **CSP** headers, and input validation to mitigate **XSS/CSRF**, enhancing asset visualization and UX.

Technical Research Assistant

Princeton University (CCNP)

Sep '23 – Present

Princeton, NJ

- Engineered a **Python**-based **ETL** pipeline to consolidate 800+ Excel, CSV, and JSON files into a unified **SQLite** database with automated schema and key constraints.
- Designed a **Tkinter** GUI for non-technical researchers to run custom SQL queries and perform advanced **CRUD** via **Pandas**, simplifying workflows.
- Developing a queryable **Python/PostgreSQL** EMR database to store patient assessments and demographics.

Full-Stack Developer Intern

Provenir (Fintech)

Jun '23 – Dec '23

Parsippany, NJ

- Developed an automated credit-risk decisioning system by integrating Decision Trees, Random Forests, XGBoost, and RNNs with **scikit-learn** and **TensorFlow**, achieving 95% accuracy and supporting 95% fully automated underwriting.
- Enhanced transparency with **SHAP/LIME**, wrote 100+ **MockMvc** tests, and streamlined **Minikube** deployments, boosting reliability 20% and reducing time-to-decision by 98%.
- Refined API endpoints for artifact generation and log retrieval to enable real-time monitoring, contributing to a 135% increase in conversions.

PROJECTS

ReddiGist | Next.js, Flask, TypeScript, NLP, Supabase

Oct 2024 – Present

- Developed a full-stack web application that analyzes Reddit discussions by processing up to 5,000 comments per request using multi-threaded retrieval and n-gram detection for accurate summarization.
- Optimized performance with **LRU caching** and batch processing, and managed data persistence via **Supabase**.

Tch.ai | Next.js, Tailwind, Flask, Keras, OpenCV, Pandas, MySQL

Apr 2023 – Jul 2023

- Built a full-stack app deploying a **Keras** image classifier (FER-2013 + OpenCV preprocessing) and tokenizer to recommend songs based on mood—achieving 96% training and >70% validation accuracy.
- Designed a responsive **Next.js/Tailwind CSS** frontend with multi-method genre selection and integrated a secure remote **MySQL** backend for user account management.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, C, SQL, C#

Web Technologies: HTML, CSS, Next.js, Tailwind CSS, Flask, Spring

Databases/DevOps: MySQL, MongoDB, SQLite, JDBC, Supabase, Docker, Kubernetes, Jenkins, Amazon AWS, Git, Jira
